3 STAGE FILTRATION SYSTEM

Effectively reduces harmful chemicals, heavy metals, chlorine, odors, discoloration, cloudiness, VOCs, and other impurities, while helping prevent scale buildup for cleaner, healthier drinking water.

UF ULTRAFILTRATION

Removes harmful chemicals, heavy metals, chlorine, odors, discoloration, and other water impurities.

PAC FILTER

Reduces chlorine, tastes, cloudiness, odors, colors and VOCs and other chemicals.

FCF FILTER

FCF Carbon prevents scale buildup and removes impurities for cleaner, healthier drinking water.

Replace the filter regularly to maintain pure and clean water

Filter Name	Recommended Replacement Cycle
UF Ultrafiltration	6-9 Months
PAC Filter	6-9 Months
FCF Filter	6-9 Months

Easy to Install & Replace

Simply twist and pull to remove the old filter and replace it with a new one—quick, easy, and hassle-free.

Twist

Twist to unlock and pull out
no tools required

Pull

Simply pull out the old filter and replace
it with a new one

Installation Specification

Essential guidelines for a smooth and accurate installation.

Product Specifications

Model	Hydrixx Mii
Dimension	W: 115mm x D:305mm x H:290mm
Filtration Type	3-Stage Filtration
Filter Type	UF PAC FCF
Water Temperature	5-38°C
Water Pressure	0.1-0.4 Mpa
Flow Rate	2.1 Litres/min
Water Purification Capacity	500 Litres
