Easy Installation &
Replacement

Filter Functions

Effectively filters impurities, odors, and unwanted particles, helping to improve water quality and deliver cleaner, fresher, and better-tasting water for a more enjoyable drinking experience.

1st Stage – Ceramic Filter

0.3 – 0.7 micron ceramic filtration removes dirt, rust, suspended solids, and helps reduce bacteria.

2nd Stage – Sediment Filter

Removes fine sediment and suspended particles, protecting the downstream filtration system.

3rd Stage – Pre-Carbon Filter

High-purity activated carbon reduces chlorine, organic compounds, and unpleasant odors while protecting the membrane.

4th Stage – Silver Carbon Filter

Silver-activated carbon helps inhibit bacterial growth within the filter media.

5th Stage – Post-Carbon Filter

Removes residual chlorine, odors, and unpleasant tastes for fresher, better-tasting water.

6th Stage – Alkaline Filter

Adds alkaline minerals to provide mineral-enriched water with a mild alkaline taste.

No Electricity Required

No electricity, no drilling, and no bulky installation required. Designed to save space while making setup quick and hassle-free, so you can enjoy convenient access to drinking water wherever you need it.

Space Saving

Featuring a sleek, modern design, this compact unit fits seamlessly into small kitchens, offices, and other space-limited areas without compromising on style or functionality.

Clean & Safe

Enjoy cleaner, fresher, and better-tasting purified water with advanced multi-stage filtration.

Product Specifications

Model	EWS MP01
Dimension	W: 330mm x D:104mm x H:415mm
Filtration Type	6-Stage Filtration
Filter Type	Ceramic Filter Sediment Filter Pre-Carbon Silver Carbon Post Carbon Alkaline Filter
Material	Glass Casing Cover
