Dual Outlet

Stronger cooling wide coverage

equipped with two independent air outlet, this dual outlet design delivers stronger airflow faster cooling and a wider coverage area ideal for larger spaces and high-demand environment

35,000 M³/H High Airflow

Experience powerful, high-volume airflow of up to 35,000m³/h, delivering rapid and efficient air circulation for fast, refreshing cooling across large spaces.

Enjoy flexible airflow control with 90° manual up-and-down adjustment for targeted cooling, combined with 120° automatic left-and-right oscillation to distribute cool airflow more evenly across larger spaces.

THICKENED cooling pad

Uses advanced cooling paper that soaks up water and cools air more efficiently. Hot air passes through the wet paper, gets cooled, and is then blown out by a fan to lower the room temperature

Advanced Bonding
Technology

High-Efficiency
Honeycomb Cooling Pad

150L

Large Water Tank

Built for Long-Lasting Commercial Cooling

Enjoy long-lasting cooling with a high-capacity 150L water tank, designed for commercial and large spaces. Less frequent refilling means longer cooling and greater convenience.

Manual & Auto Water Refill

Conveniently refill the water tank automatically or manually, giving you greater flexibility and hassle-free operation.

Feature

3 Speed + Cool Mode

Stay cool and comfortable with just one touch

Water Inlet

Easy Manual Water Filling

Continous Water Filling

Continuous Water Filling for Longer, Hassle-Free Cooling

Heavy Duty Wheel

Strong, durable wheels for easy movement

Specification

Model	Twin Cool
Size	900 x 900 x 1930 mm
Water Tank Capacity	150L
Airflow Capacity (m ³ /h)	35,000 m ³ /h
Coverage Area(m ²)	80 - 120 m ²
Power Consumption(w)	1200w
Voltage	220-240v/50Hz
